

Impax Asian Environmental Markets (Ireland) Fund holdings	Description
Aboitiz Power	Aboitiz Power Corp. operates as an investment holding company engaged in power generation and distribution. The company operates its business through three segments: Power Generation, Power Distribution, and Parent Company and Others. The Power Generation segment handles the generation and supply of power to various customers under power supply contracts, ancillary service procurement agreements and trading. The Power Distribution segment deals with the distribution and sale of electricity to the end-users. The Parent Company and Other segment involves in the operations of the company and electricity-related services of the group such as installation of electrical equipment. Aboitiz Power was founded on February 13, 1998 and is headquartered in Cebu, Philippines.
Aconex Ltd	Aconex Ltd. engages in the provision of cloud collaboration platform services. It operates through the following geographical segments: Australia and New Zealand; Americas; Asia; and Europe, Middle East, and Africa (EMEA), and Head Office. The company was founded by Leigh Matthew Jasper and Robert William Phillipot in 2000 and is headquartered in Melbourne, Victoria.
Adlink Technology	Adlink Technology, Inc. engages in the production and sale of computer-based industrial applications. Its products include motherboards, blades, chassis, modules, systems and end-to-end platforms based on industry standard form factors, extensive line of test & measurement products, smart touch computers, displays and handhelds. The company was founded on August 29, 1995 and is headquartered in New Taipei, Taiwan.
Advantech	Advantech Co., Ltd. engages in the provision of system integration solutions. Its products include industrial control and control products; industrial computer and workstations; embedded computer card; and ultra-thin liquid crystal display computer. The company was founded by Tienchung Chen, Chunsheng Ho, and Kochen Liu on September 7, 1981 and is headquartered in Taipei, Taiwan.
Airtac International	Airtac International Group engages in the manufacture and sale of pneumatic equipment's. It specializes in actuators, control components, air preparation products, and accessories. Its products are used in industry segments like packaging, printing, plastics, filling, ultrasonic, medical treatment, pharmacy, ceramics, welding, construction, lathes, sewing, metallurgy, automobiles, electronics, printing and dyeing, and textile. The company was founded in 1988 and is headquartered in Taipei, Taiwan.
ALS	ALS Ltd. provides testing services which focuses manufacturing and marketing commercial chemicals and industrial cleaning agents throughout Australia and the Pacific. It also

	<p>distributes non-food consumables. It operates through the following segments: Life Sciences, Industrial, Commodities, Oil and Gas Labs. The Life Sciences segment provides analytical testing and sampling services and remote monitoring for the Environmental, Food, Pharmaceutical, and Consumer Products markets. The Industrial segment is a leading provider of diagnostic testing and engineering solutions for the energy, resources, transportation and infrastructure sectors. The Commodities segment leads as a full-service provider of testing services for the global mining industry in four key service areas- Geochemistry, Metallurgy, Inspection, and Coal Quality-with an extensive client base of explorers, miners, and traders. The Oil and Gas Labs segment delivers quality technical solutions and products to the oil and gas industries. The company was founded in 1863 and is headquartered in Brisbane, Australia.</p>
<p>Beijing Enterprises Water Group</p>	<p>Beijing Enterprises Water Group Ltd. is an investment holding company, which engages in the construction of sewage and reclaimed water treatment and seawater desalination plants. It operates through the following segments: Sewage and Reclaimed Water Treatment and Construction Services; Water Distribution Services; and Technical and Consultancy Services. The Sewage and Reclaimed Water Treatment and Construction Services segment engages in the construction and operation of sewage and reclaimed water treatment plants, the construction of a seawater desalination plant, and the provision of construction services for comprehensive renovation projects. The Water Distribution Services distributes and sells piped water and provides related services. The Technical and Consultancy Services provides consultancy services and sells machineries related to sewage treatment and construction services for comprehensive renovation projects, and licenses technical know-how to sewage treatment. The company was founded on November 23, 1992, and is headquartered in Hong Kong.</p>
<p>Brambles</p>	<p>Brambles Ltd. engages in the provision of supply chain support services and information management solutions. It provides pallet and container pooling solutions through the CHEP and IFCO brands. It provides pooling Solutions and associated services, focusing on the outsourced management of returnable pallets, crates and containers. The company operates through the following segments: Pallets-Americas, Pallets-EMEA, Pallets-Asia-Pacific, Reusable Plastic Crates, Containers, and Corporate. The Pallets segment comprises of all CHEP pallet operations in three regions, including the IFCO pallet management services business in the U.S. and the lean logistics business in Europe and Asia-Pacific. The Reusable Plastic Crates segment provides reusable plastic crates operations under both the IFCO and CHEP brands. The Containers segment comprises of global intermediate bulk container and</p>

	<p>automotive container operations, the CHEP catalyst and chemical containers business and the newly-formed CHEP aerospace solutions. The company was founded by Walter Edwin Bramble in 1875 and is headquartered in Sydney, Australia.</p>
Canvest Environmental Protection Group	<p>Canvest Environmental Protection Group Co. Ltd. is an investment holding company. The company through its subsidiaries and is engaged in waste-to-energy project construction and operation. It provides municipal solid waste handling services and operates its waste-to-energy business through build-own-operate and build-operate-transfer projects. Canvest Environmental Protection Group was founded on January 28, 2014 and is headquartered in Hong Kong.</p>
China Everbright	<p>China Everbright International Ltd. is an investment holding company, which engages in the provision of environmental solution. It operates through the following segments: Environmental Energy Project Construction and Operation; Environmental Water Project Construction and Operation; Greentech Project Construction and Operation; and Envirotech. The Environmental Energy Project Construction and Operation segment involves in the construction and operation waste-to-energy plants, methane-to-energy plants, sludge treatment and disposal project, and food waste treatment projects. The Environmental Water Project Construction and Operation segment focuses on construction, upgrade and operation of waste-water treatment plants, reusable water treatment plants, surface water treatment plants, and waste-water source heat pump projects. The Greentech Project Construction and Operation segment manage the construction and operation of biomass integrated utilization projects, industrial solid waste and hazardous waste treatment projects, solar energy projects, and wind power projects. The Envirotech segment is conducting environmental protection technology research and development projects, the provision of environmental related technological services, design of environmental protection projects and the manufacturing and sales of environmental protection project equipment. The company was founded on July 10, 1961 and is headquartered in Hong Kong.</p>
China Longyuan Power Group Corporation	<p>China Longyuan Power Group Corp. Ltd. engages in the design, development, construction, management and operation of wind farms. It operates through the following segments: Wind Power, Coal Power, and All Other. The Wind Power segment constructs, manages and operates wind power plants and generates electric power for sale to external power grid companies. The Coal Power segment constructs, manages and operates coal power plants and generates electric power for sale to external power grid companies and coal trading business. The All Other segment comprised of manufacturing and sale of power equipment, and provision of consulting services, and maintenance and training services to wind power</p>

	plants, and other renewable power generation. The company was founded on July 8, 2009 and is headquartered in Beijing, China.
Coway	Coway Co., Ltd. engages in the manufacture and sale of household electronic appliances. It operates through the following Business Divisions: Rental, Lump-Sum Payment, and the Other. Its products include water purifiers, air purifiers, bidet, water softeners, and mattresses. The company was founded on May 2, 1989 and is headquartered in Gongju, South Korea.
Daikin Industries	Daikin Industries, Ltd. engages in the manufacture and sale of air conditioning equipment. It operates through the following segments: Air Conditioning and Refrigeration Business, Chemicals and Others. The Air Conditioning and Refrigeration Business segment provides residential air conditioners, residential air purifiers, commercial-use air conditioners, commercial-use air purifiers, large-sized chillers, marine container refrigeration units and marine vessel air conditioners. The Chemicals segment provides fluoropolymers, fine chemical products, fluorocarbons and chemical engineering machinery. The Others segment includes oil hydraulic, defence systems and electronics businesses. The company was founded by Akira Yamada on October 25, 1924 and is headquartered in Osaka, Japan.
Delta Electronics (Thailand)	Delta Electronics (Thailand) Public Co. Ltd. engages in the manufacture and export of power supplies and other electronic equipment. It operates through the following segments: Power Electronics. Energy Management, Smart Green Life, and Others. The Power Electronics segment designs, manufactures, and sells power supplies applied to computer, server, office automation equipment, household electric appliances, and automotive electronic products. The Energy Management segment offers telecom power system; industrial power system; uninterruptible power supplies (UPS), photovoltaic inverter (PIV), and industrial automation products. The Smart Green Life segment comprises of light-emitting diode lighting product and display solutions. The Others segment includes other activities. Its products include adapter, direct current-alternate current converter, power supplies, telecom power solutions, and cooling fans. The company was established on June 16, 1988 and is headquartered in Amphur Muangsamutprakarn, Thailand.
Delta Electronics	Delta Electronics, Inc. engages in the design, manufacture, sale, research and development of electronic control systems, industrial automation products, digital display products, communication products, consumer electronics products, energy-saving lighting application, and energy technology services. Its business segments include the following: Power and Components Business, Energy Management Business and Smart Green Life Business. Power and Components business provides global power management and cool plans and

	<p>management. Energy Management Business includes energy automation plans for factories and buildings. Smart Green Life Business involves in the manufacture of network devices, conferencing and visual imaging system, LED lighting Plans, Medical Devices, Innergie Power Consumptions products, and Vivitek High Definition Projector. The company was founded by Bruce Cheng on August 20, 1975 and is headquartered in Taipei, Taiwan.</p>
Dynagreen Environmental Protection Group	<p>Dynagreen Environmental Protection Group Co. Ltd. provides environmental protection services. It specializes in the waste-to-energy projects focusing on municipal solid waste treatment. Its activities include project operation, construction, and technical consulting services. The company was founded on April 23, 2012 and is headquartered in Shenzhen, China.</p>
East Japan Railway Company	<p>East Japan Railway Co. engages in the business of railway transportation services. It operates through the following segments: Transportation, Station Space Utilization, Shopping Centres and Office Buildings, and Others. The Transportation segment engages in the passenger transportation mainly the railways operations. The Station Space Utilization segment handles the creation of commercial spaces at stations for various businesses such as retail stores, restaurants, and convenience stores. The Shopping Centres and Office Buildings segment operates leasing services for office buildings situated within the vicinity of station. The Others segment involves in hotel operations and advertising agency. The company was founded on April 1, 1987 and is headquartered in Tokyo, Japan.</p>
Energy Development Corporation	<p>Energy Development Corp. is engaged in the exploration, development and operation of geothermal energy projects. It operates through the following business units: Leyte Geothermal, Negros Island Geothermal, Bacon-Manito Geothermal, Mt. Apo Geothermal, Pantabangan/Masiway, Wind-Ilocos Norte, and Others. The Leyte Geothermal business unit pertains to leyte geothermal production field and power plants. This includes projects in Tongonan, Mahanagdong, Upper Mahiao, Malitbog, ULGEI and other projects in Leyte Province. The Negros Island Geothermal business unit refers to southern negros geothermal production field and power plants. Power plants included in NIGBU are Palinpinon I and Palinpinon II and Nasulo. The Bacon-Manito Geothermal business unit relates to Bacon-Manito geothermal production field and power plants. The Mt. Apo Geothermal business unit refers to Mt. Apo Geothermal production field and power plants. The Pantabangan/Masiway relates to Pantabangan-Masiway hydroelectric complex located in Nueva Ecija province. The Wind-Ilocos Norte business unit pertains to both wind and solar projects commercially operating in Northern Luzon. The Others refers to other renewable energy projects including</p>

	foreign investments and head office of the company. The company was founded on March 5, 1976 and is headquartered in Pasig, Philippines.
ENN Energy Holdings	ENN Energy Holdings Ltd. engages in the gas supply business. It operates through the following segments: Gas Connection, Sales of Piped Gas, Vehicle Gas Refuelling Stations, Wholesale of Gas, Sales of Other Energy, Sales of Gas Appliances, and Sales of Material. The company was founded by Yu Suo Wang and Bao Ju Zhao in 1992 and is headquartered in Langfang, China.
Giant Manufacturing	Giant Manufacturing Co., Ltd. engages in the manufacture and sale of bicycles and related spare parts. Its products include mountain, children, folding, electric, off-road riding, and racing bicycles. The company was founded by Chin Piao Liu on October 27, 1972 and is headquartered in Taichung, Taiwan.
Greatview Aseptic Packaging	Greatview Aseptic Packaging Co., Ltd. is an investment holding company, which provides aseptic packaging material and related services. It offers packaging for dairy products and non-carbonated soft drink products. Its offers its products under the trademark GREATVIEW, which includes Greatview Brick, Greatview Pillow, Greatview Crown, Greatview Octagon, and Greatview Blank-Fed. It operates through the PRC and International geographical segments. The company was founded by Gang Hong and Hua Bi on July 29, 2010 and is headquartered in Beijing, China.
Guangdong Investment	Guangdong Investment Ltd. is an investment holding company, which engages in the provision of water resources, and property investment and development. It operates through the following segment: Water Resources, Property Investment and Development, Department Store, Electric Power Generation, Road and Bridge, Hotel Operation and Management, and Others. The Water Resources segment consists of water distribution, and sewage treatment in Mainland China, and Hong Kong. The Property Investment and Development segment includes property management services to certain commercial properties. The Department Store segment operates department stores in Mainland China. The Electric Power Generation segment is comprised of coal-fired power plants supplying electricity and steam in Guangdong province. The Road and Bridge segment invests in road and bridge projects. The Hotel Operation and Management segment operates the Group's hotels and manages third parties' hotels. The Others segment provides treasury services, and corporate services to other segments. The company was founded on January 5, 1973 and is headquartered in Hong Kong.
HollySys Automation Technologies	HollySys Automation Technologies Ltd. engages in the provision of automation and control technologies and applications. It operates through the following segments: Industrial

	Automation, Rail Transportation, and Mechanical and Electrical Solution. The Industrial Automation segment consists of third-party hardware-centric products such as instrumentation and actuators; its proprietary software-centric distributed control systems and programmable logic controller; and valued-added software packages. The Rail Transportation segment includes train control centre and automation train protection. The Mechanical and Electrical segment provides design, engineering, procurement, project management, construction and commissioning, and maintenance related services to railway transportation. The company was founded by Chang Li Wang and An Luo in March 1993 and is headquartered in Beijing, China.
Horiba	Horiba Ltd. engages in the manufacture and sale of instruments and systems for various industrial applications. It operates through the following segments: Automotive Test Systems, Process & Environmental Instruments & Systems, Semiconductor Instruments & Systems, Medical-Diagnostic Instruments & Systems, and Scientific Instruments & Systems. The Automotive Test Systems segment sells emission measurement systems, automotive emission analysers, onboard emission measurement systems, driveline test systems, engine test systems, break test systems, and drive recorders. The Process & Environmental Instruments & Systems segment manufactures stack gas analysers, water quality analysis and examination systems, air pollution analysers, and environmental radiation monitor. The Semiconductor Instruments & Systems segment includes mass flow controllers, chemical concentration monitors, reticle/mask particle detection systems, and residual gas analysers. The Medical-Diagnostic Instruments & Systems segment offers equipment for blood sample analysis. The Scientific Instruments & Systems segment sells particle-size distribution analysers, x-ray fluorescence analysers, Raman spectrophotometers, spectrometers, gratings, and pH meters. The company was founded by Masao Horiba on October 17, 1945 and is headquartered in Kyoto, Japan.
Huaneng Renewables Corporation	Huaneng Renewables Corp. Ltd. engages in the business of wind power generation. It also constructs and operates power plant. The company was founded in 2002 and is headquartered in Beijing, China.
Indraprastha Gas	Indraprastha Gas Ltd. engages in the supply of compressed natural gas to transport sector, piped natural gas to domestic, industrial, and commercial sectors. The company was founded on December 23, 1998 and is headquartered in New Delhi, India.
Keyence Corporation	KEYENCE Corp. engages in the development, manufacture and sale of industrial automation and inspection equipment. Its products include sensors, measurement sensors, measurement systems, safety equipment, image processing equipment, process controls and

	<p>sensors, programmable controllers, static eliminators, touch panels, bar code readers, microscopes, recorders, laser markers, three dimensional printers, business information equipment, packaged software and others. It also engages in the research and development of analytical instruments. The company was founded by Takemitsu Takizaki in March 1972 and is headquartered in Osaka, Japan.</p>
Kubota Corporation	<p>Kubota Corp. engages in the manufacture and sale of agricultural and construction machinery equipment. It operates through the following segments: Machinery; Water and Environment; and Others. The Machinery segment consists of agricultural equipment and its related products, engines, and construction machinery. The Water and Environment segment includes pipe-related products such as ductile iron pipes, plastic pipes, valves, and pumps; environment-related products; and social infrastructure-related products such as industrial castings, spiral welded steel pipes, vending machines, electronic weighing systems, precision and air-conditioning equipment. The Others segment offers design, construction and residential equipment manufacturing services. The company was founded by Gonshiro Kubota in February 1890 and is headquartered in Osaka, Japan.</p>
Lee & Man Paper Manufacturing	<p>Lee &amp; Man Paper Manufacturing Ltd. is an investment holding company, which engages in manufacturing and trading of paper and pulp products. It operates through the following business segments: Packaging Paper, Pulp, and Tissue Paper. The Packaging Paper segment includes Kraft linerboard, test linerboard, coated duplex board, white top linerboard and high strength corrugating medium. It offers white lined chipboard, pulp, containerboard, and toilet roll products. The company was founded by Man Chun Lee and Wan Keung Lee in 1994 and is headquartered in Hong Kong.</p>
LG Chem	<p>LG Chem Ltd. manufactures petrochemicals, IT &amp; electronic materials and energy solution materials. It operates through the following business segments: Petrochemicals, IT &amp; Electronic Materials, Batteries. The Petrochemical division offers naphtha cracking centres and polyolefins, synthetic rubbers and specialty polymers, polyvinyl chloride, acrylonitrile-butadiene-styrene and engineering plastics, acrylates and plasticizers. The IT &amp; Electronic Material division provides optical and display materials namely polarizers, phosphors, organic light emitting diode, photosensitive materials for liquid crystal display; printed circuit materials such as flexible materials, halogen free materials, integrated circuit packaging materials, epoxy resin system materials, high speed materials and build-up materials; toners such as colour toners, black laser printer toners and black copier toners. The Battery division provides lithium-ion cylindrical batteries, lithium-ion polymer batteries, lithium-ion prismatic batteries, medium and large batteries. The company was founded on April 1, 2001 and is headquartered in Seoul, South Korea.</p>

Murata Manufacturing	Murata Manufacturing Co., Ltd. engages in research, development, manufacture, and sale of electronic components and devices made from fine ceramics. It operates through the following divisions: Components, Modules, and Other. The Components division offers capacitors and piezoelectric products. The Modules segment provides communication modules and power supplies. The Other segment handles employee welfares, staffing, education and training, and facility maintenance services, including operational software for affiliates. The company was founded by Akira Murata in October 1944 and is headquartered in Nagaokakyo, Japan.
Nidec Corporation	NIDEC CORP. engages in the development, manufacturing, and sales of small precision, automotive, commercial and industrial motors, motors for machinery, electronic and optical components, and other related products. It operates through the following segments: Nidec, Nidec Electronics Thailand, Nidec Singapore, Nidec Hong Kong, Nidec Sankyo, Nidec Copal, Nidec Techno Motor, Nidec Motor, Nidec Motors and Actuators, and Others. The Nidec segment includes Nidec Corporation, which develops and sells hard disk drive (HDD) motors, small motors, and in-vehicle products. The Nidec Electronics Thailand segment includes Nidec Electronics (Thailand) Co., Ltd. and its subsidiaries. It also manufactures and sells HDD motors. The Nidec Singapore segment includes Nidec Singapore Pte Ltd. and its subsidiaries. It also sells HDD and other small motors. The Nidec Hong Kong segment includes Nidec (Hong Kong) Co., Ltd. and its subsidiaries. It produces and markets HDD and other small motors. The Nidec Sankyo segment Nidec Sankyo Corp. and its subsidiaries. It manufactures and sells automotive products, electronic components, and other small motors. The Nidec Copal segment includes Nidec Copal Corp. and its subsidiaries. It manufactures and sells optical and electronic products and equipment. The Nidec Techno Motor segment includes Nidec Techno Motor Corp. and its subsidiaries. It produces and sells commercial and industrial products. The Nidec Motor segment includes Nidec US Holdings Corp. and its subsidiaries in North and South America, Asia, and Europe. Its main products include consumer electronics and commercial and industrial products. The Nidec Motors & Actuators segment includes Nidec Motors & Actuators (Germany) GmbH and its subsidiaries in Europe, Japan, Asia, and North and South America. It manufactures and sells automotive products. The Others segment includes Nidec Global Service Corp. The company was founded by Shigenobu Nagamori and Hiroshi Kobe on July 23, 1973 and is headquartered in Kyoto, Japan.
Petronet	Petronet LNG Ltd. engages in the import, supply and regasification of liquefied natural gas. It owns and operates liquefied natural gas regasification terminal with the name plate capacity

	of 10 MMTPA at Dahej and also setting up another greenfield liquefied natural gas regasification terminal with the name plate capacity of 5 MMTPA at Kochi. The company was founded by Suresh Chand Mathur on April 2, 1998 and is headquartered in New Delhi, India.
Power Grid Corporation of India	Power Grid Corp. of India Ltd. is a holding company, which engages in the transmission business. It operates through the following segments: Transmission, Telecom and Consultancy. The Transmission segment gives power across different states of India. The Telecom segment provides point to point bandwidth leasing business. The Consultancy segment involves in the in-house expertise in the transmission, distribution and telecom sectors. The company was founded on October 23, 1989 and is headquartered in Guragaon, India.
Rural Electrification Corporation Limited	Rural Electrification Corp. Ltd. provides financial assistance to state electricity boards, state government departments and rural electric cooperatives for rural electrification projects. It provides loan assistance to SEBs, State Power Utilities for investments in rural electrification schemes. Its projects include: Generation-conventional, Generation-Renewable and transmission & Distribution. Rural Electrification was founded on July 25, 1969 and is headquartered in New Delhi, India.
Sekisui Chemical	Sekisui Chemical Co., Ltd. engages in the manufacture of high performance plastics for medical, automotive, and information technology industries; and offers residential housing construction. It operates through the following segments: Housing, Urban Infrastructure and Environmental Products, High Performance Plastics, and Others. The Housing segment manufactures, builds, sells, and refurbishes unit housing. The Urban Infrastructure and Environmental Products segment handles the manufacture, sale and construction work related to polyvinyl chloride and polyethylene pipes and joints, pipe and drain renewal materials and construction methods, reinforced plastic pipes, and construction materials. The High Performance Plastics segment produces and merchandises interlayer films for laminated glass, polyolefin foams, tapes, liquid crystal display fine particles, photosensitive materials, and diagnostic drugs. The Others segment includes agricultural, industrial and construction materials; and provision of services. The company was founded on March 3, 1947 and is headquartered in Osaka, Japan.
SFA Engineering Corporation	SFA Engineering Corp. engages in the manufacture and sale of machinery and automation equipment. It operates through the following business divisions: Display Manufacturing Equipment, Distribution, and Semiconductor Packaging. The company was founded on December 18, 1998 and is headquartered in Hwaseong-si, South Korea.

Thermax	Thermax Ltd. provides engineering solutions to the energy and environment sectors. It provides essential utilities, which include heating, cooling, water treatment, chemicals and power, for industrial production. The company also offers critical support in waste management and product recovery. It operates through the following segments: Energy and Environment. The Energy segment products include boilers and heaters, absorption chillers, heat pumps and power plants. The Environment segment products include air pollution control equipment and systems, water and waste recycle plants, ion exchange resins and performance chemicals. The company was founded by A. S. Bathena in 1966 and is headquartered in Pune, India.
Towngas China	Towngas China Co. Ltd. operates as an investment holding company. The company through its subsidiaries engages in the in the sales and distribution of piped gas in China, which includes the provision of piped gas, construction of gas pipelines, the operation of city gas pipeline network, the operation of gas fuel automobile refilling stations, and the sale of gas household appliances. It operates through two segments: Sales and Distribution of Piped Gas and Related Products; and Gas Connection. The Sales and Distribution of Piped Gas and Related Products segment involves the sales of piped gas and gas related household appliances. The Gas Connection segment engages in the construction of gas pipeline networks under gas connection contracts. Towngas China was founded on November 16, 2000 and is headquartered in Hong Kong.
TTW Public Company	TTW Public Co. Ltd. engages in the production and sale of treated water. It operates the following businesses: tap water; water management; and renewable energy and eco-friendly. The company was founded on September 11, 2000 and is headquartered in Sam Pran, Thailand.
VA Tech Wabag	VA Tech Wabag Ltd. engages in the design, supply, installation, and operational management of drinking water and waste water treatment plants. It offers design, engineering, procurement, construction, erection, commissioning, operation, and maintenance solutions for drinking water, industrial waste water, municipal waste water, industrial and process water, sea water and brackish water desalination, and industrial and municipal waste water treatment. The company was founded on February 17, 1995 and is headquartered in Chennai, India.
Vitasoy International	Vitasoy International Holdings Ltd. engages in manufacture and sale of foods and beverages. It operates through the following geographical segments: The Mainland China, Hong Kong Operation, Australia and New Zealand, Singapore, and North America. The Mainland China segment comprises of the manufacture and sale of soymilk, tea, and juice. The Hong Kong

	<p>Operation segment deals with the manufacture and sale of beverage products in Hong Kong and Macau. The Australia and New Zealand segment offers soymilk and rice milk products. The Singapore segment retails soy related products. The North America segment covers the manufacture and sale of tofu, pasta, imported soymilk, imported juice, and imported tea. The company was founded by Kwee Seong Lo on March 6, 1940 and is headquartered in Hong Kong.</p>
Xinyi Glass Holdings	<p>Xinyi Glass Holdings Ltd. engages in the provision of solutions in glass products including high-quality float glass, automobile glass, engineering glass, and electronic glass. The company operates through the following segments: Automobile Glass, Construction Glass and Float Glass. Its customers include companies in the business of automobile glass manufacturing, wholesale and distribution, automobile repairs, motor vehicle manufacturing, construction and furniture glass manufacturing, float glass wholesale and distribution, and solar module manufacturing. The company was founded by Lee Yin Yee in November 1988 and is headquartered in Hong Kong.</p>
Xinyi Solar Holdings	<p>Xinyi Solar Holdings Ltd. engages in the manufacture and sale of solar photovoltaic glasses. The company offers two principal solar glass products to its customers: ultra-clear photovoltaic raw glass and ultra-clear photovoltaic processed glass. Its ultra-clear photovoltaic raw glass is a semi-finished patterned glass product that can be used for the production of ultra-clear photovoltaic processed glass or sold to other glass manufacturers or processing companies for further processing; and ultra-clear photovoltaic processed glass is mainly used in solar modules based on crystalline silicon technology. The company was founded on December 12, 2013 and is headquartered in Wuhu, China.</p>
Zhuzhou CRRC Times Electric	<p>Zhuzhou CRRC Times Electric Co., Ltd. engages in the sale and manufacture of train-borne electrical systems and electrical components. It provides propulsion and control systems for high speed trains, electrical multiple unites, mass transit, electric locomotives, and diesel locomotives. The company products include propulsion and control systems, signalling systems, power supply systems, maintenance vehicles, door systems, and toilet systems. Zhuzhou CRRC Times Electric was founded on September 26, 2005 and is headquartered in Zhuzhou, China.</p>
